Rajajinagar, Bangalore 

MCA graduate with practical experience in full-stack development, software testing, SQL, and data analysis. Proficient in Java, Python, PHP, MySQL, Selenium, Git, and Pandas. Knowledgeable in SDLC, MVC, and Agile methodologies. Strong problem-solving and communication skills. Seeking an entry-level role in software development, QA, or analytics.

Education

St. Joseph Engineering College Mangalore

Master of Computer Applications, CGPA: 8.76
2024 | Mangalore

SDM College Ujire

Bachelor of Computer Applications, CGPA: 6.74
2022 | Ujire

Experience

ParroPhins Pvt.Ltd.

Software Developer Intern
Apr 2024 - Sep 2024 | Mangalore, Karnataka

- Built scalable backend modules using CodeIgniter, PHP, and JavaScript.
- Designed optimized SQL queries, indexing, and stored procedures to improve DB performance.
- Integrated RESTful APIs with frontend using AJAX, jQuery, and RBAC security.
- Modeled relational schemas using MySQL/PostgreSQL, focusing on normalization and security.

Protriden Technology

Web Developer Intern
Nov 2023 - Dec 2023 | Kundapura, Karnataka

- Developed responsive web pages using HTML, CSS, JS, jQuery.
- Created secure PHP-based login & session management system.
- Enhanced performance via database normalization & indexing.

Projects

- St. Joseph Anekal School Management System | Codeigniter, PHP, JavaScript, jQuery, HTML/CSS, MySQL**
 - Developed and deployed a secure, scalable School Management System using CodeIgniter, PHP, JavaScript, HTML/CSS, and MySQL, optimizing administrative efficiency and user communication.

- Implemented role-based access control (RBAC), database validation, and security measures, ensuring data integrity, authentication, and system reliability.
- Designed and optimized SQL queries, indexing strategies, and database schemas, enhancing performance, data retrieval speed, and system scalability

2. Cricket IPL Analysis| Python, NumPy, pandas, scikit-learn.

- Processed, cleaned, and optimized IPL cricket datasets using data preprocessing techniques, ensuring data accuracy and integrity.
- Applied machine learning models with Scikit-learn for demand prediction, validating model accuracy, consistency, and performance against predefined test cases.

Certifications

- Python for Data Science, AI & Development – IBM
- Software Security – IBM
- UX/UI Design Specialization - Coursera
- Modern Art & Ideas – MoMA
